## About This Content

Created by the IJC crew from the Killing Floor community, all revenues from this pack are shared with that community team!

This is a weapon pack of two halves. We have weapons created by the people, for the people - and you can have a couple of Horzine's latest prototype weapons. Try them all out and you decide which is best! The first two are really for the down-to-earth, home-grown Zed-killer, while the other pair were designed with the tech elite, I'm-not-get-Zed-on-MY-hands type.

## The ErsatzWaffen

**The Blower Thrower:** This is a gasoline-powered leaf blower modified to shoot a stream of vile liquid up to 35 meters. The user can spray gag-inducing, poison bloat bile to take down enemies that will often blame the attack on the nearest bloater.

-

**The Seal Squeal harpoon gun:** For most people, launching a meter-long steel harpoon into an enemy would be enough, but industrious walrus hunters added a time delayed explosive to these shafts for extra boom.

## The Horzine Advanced Prototypes

**Seeker 6:** A hand-portable missile launcher firing batches of 6 mini-seeker missiles into whatever the user paints with a laser designator. They may take different paths but the missiles all seek the same enemy, even behind light barricades.

**ZG2:** The second prototype of the famous Zed Gun. This (barely) handheld edition replaces the large radar screen with a small flashing indicator and eliminates the need for heavy battery packs because electro-stun grenades stun targets more efficiently than energy intensive beams.

if you really need to get rid of your money, send it to me instead!. This game starts off easy but gets very hard very fast. It is a real challenge.

It has intuitive controls and retro 8-bit art.. if you like hotline miami games , this will be fun (and easier...) for you. i played less than an hour.. got to the second boss.. ( a bit too quick i think)  
but i enjoy it.

i wish it would be as hard as hotline miami , because its way too easy (but again... enjoyable). This game at full price is not worth it. It fun and challanging and I recommend at the price I paid during the halloween sale of 2 bucks.. cant complain about somthin thats free. A lot of game per buck but also something that has been made as web browser games.. This is a really relaxing game.. The game is fun, silly, and reasonably stable.

That said, games are easy to make but hard to finish. Sadly, it would appear to have been abandoned at this point. If you buy it, dont expect the game to be finished at any point down the line.

Excellent game and worthy purchase

. Really like this game. Played only Ys Seven before and probably won't play Ys VIII with its current state, this game is better than Ys Seven in terms of gameplay and content while falling in story. Camera could improve with implementing wider FOV because zoom out FOV isn't wide enough. Great game. Simple but fun!. After having seen the game being broadcast for the first time on youtube, i was genuinely intrigued by this new and upcoming RPG.

Pros: The Artwork

Great soundtrack.

Interesting story.

The challenging combat.

The sense of true progression when you finally gather enough items to upgrade or craft a new piece of gear.

The unique NPC's and various other enemies.

Attention to tiny details.

Cons: Issues with the XBOX one controller not properly working. D-pad doesn't open up the correct thing.

Final Verdict: 10/10 and i would highly recommend this game to my friends and any other RPG fan.. Never have I had a game where a whale took a torpedo to save my life. 10/10 RIP Mr. Whale press F to pay respects. thank you loved the walking dead theme pinball. I got this software day 1 and it has come a long way. The developer is responsive and delivers on promises for game profiles. The software itself works nicely in my opinion and alleviates the sickness I was experiencing when playing the Serious Sam games with locomotion. Not only that, it can help a lot of games be more immersive. It feels more real to me than gliding around with regular locomotion movement. I have heard it's also great with Skyrim VR and once I get that game I will certainly be checking it for myself. Great little piece of software for a fair price. Helped me play a set of awesome games that I could not before and helps immersion as well.. Too serious for me

10/10. I still love Cosmic Osmo for what it is, even all these years later. It's not much of a game, much closer to a "toy", you play with it, but it doesn't really have anything that defines it as a game by modern standards; There is no winning or losing, there are no time limits, there are no objectives. You wander around neat places, interact with silly stuff, play with things you find, et cetera.

And, being a Cyan game, Cosmic Osmo shows that they have beautifully detailed and expressive art design, even in straight-up black and white. Damn! Look at those monochromatic pixels, they're great!

This is a great game for kids if you need to keep them entertained for a while, also good for grown-up kids who want to unwind to a game with zero expectations and a lot of content/hidden fun for you to discover.

Since this game cannot be purchased on its own, I can only tell you whether or not it is a worthwhile addition to the Cyan Collection:

**Hell yes it is.**
